

Website Design for Schools

20 Inservice Points

Component No. 3 007 011

General Objective:

To design and implement the school website.

Specific Objectives:

1. To learn how to change graphics, text, pictures, and import into the website.
2. To learn new html tags to better design a website.
3. To learn how to use an “editor”.
4. To learn how to incorporate design elements into the website to make it more user-friendly.
5. To learn how to insert links.
6. To differentiate between fonts, focusing on attractiveness and readability.
7. To transfer this knowledge to middle school students so that they can build a better website.

Activities

1. Import information from school administration
2. Imbed .pdf files in documents
3. Imbed links to sites as requested by administration
4. Maintain the school website throughout the year
5. Teach middle school students how to design and maintain personal and/or educational websites.
