NWEA MAP (Measures of Academic Progress)

## General Objectives:

1. To increase awareness of assessment.
2. To increase awareness of how results can drive teaching.

## Specific Objectives:

1. Provide information on how to dissect data after MAP has been administered.
2. Provide information on how to drill down to look at specific areas based on individual student results and tailor teaching and/or small groups around that.
3. Provide a collaborative model for teachers to set goals using the investigation of results.
4. Provide examples and practical application of using the MAP results and reports.

## Activities:

1. Participation in the preparation and presentation of assigned tasks
2. Participation in large and small groups discussion, sharing and possible presentation of reports learned about during training.
3. Reading and research on assigned topics.
4. Preparation of instruction, discussion and application of learned materials.
5. Use of online resources through NWEA to expand instruction on MAP topics.

## Evaluation:

1. Evaluation form
2. Individual participation in workshops
3. Individual lesson plans outlining how to implement the differentiation of teaching according to the information learned at the training.
